

A donation of a water pump has been made in your honor

Small farmers rely on rainfall to water their crops. Production of papaya comes to a near stand still during several months of the year. A simple, low-tech irrigation tool like a water pump would help boost the farmers' yield during the dry season.

The donation of water pump serves as a symbolic gift and will support Partners for Just Trade's work toward building a just, global marketplace that includes Cameroonian farmers whose land has been usurped by a multinational corporation. The Fair Fruit project has renewed the hope for the families and communities involved in its production.
