

A donation of a tank of gas has been made in your honor

The dehydrators used to dry our fruit are fueled by gas. A new group needs to purchase tanks of gas—a hefty startup investment. The gift of a tank of gas helps the women eliminate yet another startup expense for their new drying activity.

The donation of tank of gas serves as a symbolic gift and will support Partners for Just Trade's work toward building a just, global marketplace that includes Cameroonian farmers whose land has been usurped by a multinational corporation. The Fair Fruit project has renewed the hope for the families and communities involved in its production.
