

PERU

silver jewelry

Our uniquely Peruvian silver jewelry features contemporary designs using traditional techniques and materials including filigree (hand-crafted fine wire work), manta fabric, and red and black huayruro seeds from the jungle.

The artisans of Munay Rumi met while working in poor conditions at a jewelry factory, where they often didn't get paid for months. They started their own business, which allows them to work in a good environment and to explore their individual creativity while building a collection of beautiful designs.
